**H.R. 5534, the Comprehensive Immunosuppressive Drug Coverage for Kidney Transplant Patients Act of 2019 is introduced.**

H.R. 5534 is a bipartisan legislation that would extend Medicare coverage of immunosuppressive drugs for kidney transplant patients ensuring patients can afford these necessary medications. The bill would ensure that kidney transplant recipients maintain Medicare Part B coverage of immunosuppressive drugs, which are necessary to avoid organ rejection, beyond the current 36 months. Industry leaders are seeking industry professionals and patients to reach out to their representatives.
